

View over Kathamndu from Swayambhu in 1987 and 2011. The greenary visible on the photo of 1987 is completely replaced with new buildings in 2011.

These two photos from 1998 and 2016 document the excessive growth of Kathmandu to the west. In 2011 the cultivated fields in the plain area are replaced by concrete buildings.

The entrance to Balaju 1996 with trees along the road. The first new building is seen on the left side. The entrance to Balaju 2016 documents the massive widening of the road and construction of a lot of new buildings.

These two photos from 2005 and 2016 show the developments along the Bishnumati River taken from the bridge near Balaju. Most of the temporary shelters on the left side of the rivers are replaced with a playground and new houses.

Thapathali junction during 1989 and 2016. The small forest of a Kumari Temple is reduced to few trees. Many new buildings can be seen towering around.
